

# Is your child well today?

## Child's symptoms...

A persistent, dry cough

A loss of taste or smell

A temperature of 37.8°C or higher\*

## What to do...

- You **must** keep your child at home
- Immediately inform school via Studybugs

We will then send you more detailed instructions about these next steps:

- Arrange a COVID-19 test
- Keep your child at home for 10 days or until a negative test result
- Other household members will need to self-isolate for 14 days or until receiving your child's negative test result

**\*You must still follow the "What to do" guidelines if your child's temperature is now below 37.8 as a result of medication e.g. Calpol**

## Child's symptoms...

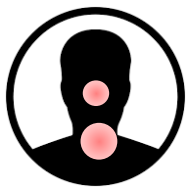

Vomiting and/or diarrhoea

## What to do...

- You **must** keep your child at home until 48 hours *since the last bout of illness*
- Inform school via Studybugs
- A COVID-19 test is **not** needed at this stage

## Child's symptoms...

A sore throat **or** heavy cold (not just the sniffles!)

## What to do...

- We **strongly advise** you keep your child at home until they no longer have these symptoms
- Inform school via Studybugs
- A COVID-19 test is **not** needed at this stage
