

Is your child well today?

Child / household member's symptoms...	
	A persistent, dry cough
	A loss of taste or smell
	A temperature of 37.8°C or higher*

What to do...
<ul style="list-style-type: none"> You must keep your child at home Immediately inform school via Studybugs and our dedicated Covid email address We will then send you more detailed instructions about these next steps: Arrange a COVID-19 test Keep your child at home for 10 days or until a negative test result Other household members will need to self-isolate for 10 days or until receiving the negative test result

***You must still follow the "What to do" guidelines if the temperature is now below 37.8 as a result of time or medication e.g. Calpol**

Child's symptoms...	
	A rash / hive like marks
	A sore throat or heavy cold
	More tired than usual / headaches
	A change in taste/smell e.g. "this tastes funny"

What to do...
<ul style="list-style-type: none"> We strongly advise you keep your child at home until they no longer have these symptoms Inform school via Studybugs We recommend calling 111 or using the online symptom checker in these circumstances as these are common symptoms of COVID-19 within children and a test may be recommended.

Child's symptoms...	
	Vomiting and/or diarrhoea

What to do...
<ul style="list-style-type: none"> You must keep your child at home until 48 hours <i>since the last bout of illness</i> Inform school via Studybugs
